Agreement and Authorization for Services

VI. Use of AI Transcription Technology and Audio Recordings

Under California law, it is illegal for a confidential communication to be recorded without the consent of all parties

involved. This includes conversations between doctors or medical professionals and their patients.

[Practice Name] may sometimes use artificial intelligence ("AI") transcription technology to help providers create notes about my care and update my medical record. The technology does this by analyzing audio of my visit and using it to write down conversations I have with my provider as they occur, similar to a physician's scribe. The provider must review and approve the record of the conversation to ensure it is correct before any AI created notes are added to my chart. The vendor used by Community Provider Plus is HIPAA-compliant to prevent unauthorized access to my protected health information. If I would like to allow my provider to use this feature, I must opt-in here. If I opt-in, I can verbally opt-out at any time during a specific visit to stop the use of the technology during that visit. At any time, I may completely revoke my consent to allow the use of the technology by notifying staff at my [Practice Name] clinic of my decision in writing. Choosing not to opt-in will have no effect on my ability to receive treatment.

The use of recording devices such as cell phones, audio recorders, or any other equipment used to capture or record images and/or sound by patients or other visitors without the consent of doctors or medical professionals is prohibited.

☐ By checking this box, **I provide my consent to the audio recording of my visits and the use of AI transcription technology** to help my provider create notes about my care and update my medical record. The recording and associated documentation may also be used for the further improvement of the AI technology.

☐ By checking this box, **I do not provide my consent to the audio recording of my visits or the use of AI technology** to help my provider create notes about my care and update my medical record.

I have read each of the foregoing, VI and fully agree to each of the statements and agreements herein, which may include inpatient treatment after emergency or outpatient care, by signing below as my free and voluntary act.
